## **SUPREME GREEN** **THE OPTIMISED INNER GLOVE**

**SMOOTH SURFACE STRUCTURE** – improved donning  
**THINNER WALLTHICKNESS** – more tactile sense  
**HIGH SECURITY** – quick detection of perforations

# THE OPTIMISED INNER GLOVE

The ideal inner glove: The green color facilitates the detection of a glove perforation during surgery. In combination with Sempermed® Supreme or Sempermed® Supreme Plus, Sempermed surgical gloves constitute the optimum glove solution with regard to safety and comfort.

- Sempermed® Supreme Green is the ideal inner glove for **double gloving**, an increasingly common practice aiming to optimise protection against infections. The surgeon wears 2 pairs of gloves in order to be able to quickly recognise outer glove perforations, which otherwise often go unnoticed. If liquid gets in between the gloves, it forms a clearly visible stain so that the outer glove can be changed immediately. **The green color** of the inner glove **reinforces** the **staining** caused by the liquid.
- Sempermed® Supreme Green has been adapted according to Sempermed® Supreme and can be donned more easily because of the smooth surface structure. The wall thickness has been reduced significantly to ensure an **even higher sensitivity** with **consistent security**.
- The synthetic lining of the Sempermed® Supreme Green gloves makes them **easy to don** and facilitates **changing gloves during surgery**.

## TECHNICAL DATA

sempermed® supreme green																			
<b>TYPE</b>	Sterile surgical glove for single use, powder-free, with synthetic lining																		
<b>MATERIAL</b>	Natural rubber latex (NR)																		
<b>COLOR</b>	Green																		
<b>GLOVE SHAPE</b>	Fully anatomical with rolled rim																		
<b>SIZE/OVERALL LENGTH</b> as per EN 455-2	<table border="0"> <tr> <td>5 ½, 6 and 6 ½</td> <td>min. 270 mm</td> </tr> <tr> <td>7, 7 ½ and 8</td> <td>min. 280 mm</td> </tr> <tr> <td>8 ½ and 9</td> <td>min. 285 mm</td> </tr> </table>	5 ½, 6 and 6 ½	min. 270 mm	7, 7 ½ and 8	min. 280 mm	8 ½ and 9	min. 285 mm												
5 ½, 6 and 6 ½	min. 270 mm																		
7, 7 ½ and 8	min. 280 mm																		
8 ½ and 9	min. 285 mm																		
<b>WALL THICKNESS</b> measured in single layer in palm area	0.17 - 0.20 mm																		
<b>IMPERMEABILITY/FORCE AT BREAK</b> as per EN 455-1/EN 455-2	AQL 0.65 / ≥ 12 N																		
<b>DURABILITY</b>	3 years in original packaging if stored as per DIN 7716, ISO 2230																		
<b>STERILISATION</b>	Radiation <span style="border: 1px solid black; padding: 0 2px;">STERILE R</span>																		
<b>LABELLING</b>	EN 1041, EN 420, ISO 15223																		
<b>PURPOSE</b> as set out in MDD 93/42 EEC as set out in PPE 89/686 EEC	Medical device class IIa Single-use protective glove – PPE category III (protection against chemical substances for limited time) <sup>1)</sup>																		
<b>PACKAGING</b>	Left and right glove turned inside out, in fiber-free inner pouch, ozone-tight, sealed in medical peel pack in dispenser carton with sterilisation indicator: 50 pairs in transport carton with sterilisation indicator: 300 pairs
